

TIPS & TRICKS FOR PHOTO COMPOSITIONS

1 RULE OF THIRDS

Imagine your frame divided into nine equal parts. Place key elements along the lines or at the intersections to create balance and interest.

2 FRAME INSIDE A FRAME

Use natural or man-made frames (doors, windows, arches, trees) to draw attention to your subject and add depth.

3 LEADING LINES

Use lines in your scene (roads, paths, rails, fences, etc.) to lead the viewer's eye toward your subject or the focal point.

4 BREATHING (NEGATIVE) SPACE

Give your subject room to breathe by using empty space. It creates emphasis, mood, and a sense of simplicity.

5 REPEATED OBJECTS OR PATTERNS

Patterns create visual rhythm, movement, and a strong sense of order and harmony.

6 BROKEN PATTERN

Breaking a pattern creates contrast and draws the eye to the element that stands out.

7 FILL THE FRAME

Fill the frame with your subject to eliminate distractions and create a strong, impactful image.

8 S-SHAPED CURVE

Use S-curves in your composition to add movement, flow, and a pleasing sense of depth.

EXTRA TIP: These tips work great on their own—but even better when combined. Practice, observe, and most importantly—have fun!
